

ANNUAL STUDENT SEMINAR IN PHYSIOLOGY

Seminars and workshops are extremely significant in the lives of students. Seminars, and presentations are extremely beneficial to students since they enable them to evaluate, stay up to date on current events, comprehend concepts, and build their network. By learning about new topics, student feels encouraged and motivated. It improves their communication skills, help them to gain expert knowledge, and renew their motivation and confidence.

Department of Physiology has successfully organized Students Seminar every year since the introduction of CBCS system in 2018. Students in their final year of study are required to present a seminar with power point slides after selecting a topic relevant to their study area. All participants get certificates and the best speaker is awarded. Following tables summarizes the effort of the department to inculcate experiential learning among students.
