

FIELD STUDY- 1

Title: Field trip at Agri- Horticultural Society of India

Date: 08.04.2022

Duration: 4 hr

Place: Agri- Horticultural Society of India

Participants: Semester-VI General

Objectives: To know about Horticulture and importance, Horticultural techniques.

Outcome: The study revealed that Horticultural crops perform a vital role in the Indian economy, providing raw material to various food processing industries, and higher farm profitability. Based on the type of crops produced and how the plants are used, the horticulture industry can be divided into three major areas. They are floriculture, olericulture, pomology and post-harvest technology. Students have come to know about the details of different types of plants like medicinally important plants, ornamental plants and their cultivation process and maintenance.

List of students participated:

ROLL NO.	NAME
