V(3rd Sm.)-Zoology-H/CC-6/CBCS

# 2021

### **ZOOLOGY** — HONOURS

### Paper : CC-6

#### Full Marks : 50

The figures in the margin indicate full marks. Candidates are required to give their answers in their own words as far as practicable.

#### Answer any ten questions.

1.	What are the	different types of	epithelial	tissues?	Mention s	specific	location	of each type.	$2^{1/2}+2^{1/2}$

- 2. Write about the role of different cells in ossification. Distinguish between spongy and compact bone. 3+2
- 3. Describe the changes that occur during repolarization and depolarization in a nerve fibre.  $2\frac{1}{2}+2\frac{1}{2}$

4.	Briefly describe	the histological	characteristics	of adrenal	cortex.	Name	the hormones	secreted	from
	each zone.								4+1

- 5. Draw and describe the histological features of Graafian follicle. 2+3
- 6. Mention the site of secretion and one important function of each of the following : 5
  - (a) Calcitonin
  - (b) Prolactin
  - (c) Oxytocin
  - (d) Gonadotropin releasing hormone
  - (e) Epinephrine.
- Mention structural and functional differences between myelinated and non-myelinated nerve fibres. Name two glial cells with their functions.
   3+2
- 8. (a) Mention the functions of areolar tissue.
  - (b) State the role of calcium in muscle contraction. 2+3
- 9. Name different cell types of endocrine pancreas. Mention the hormones secreted from each type.
- 10. Describe the ovarian and uterine changes during proliferative phase of menstrual cycle.  $2\frac{1}{2}+2\frac{1}{2}$

**Please Turn Over**
