

**Description of Field Survey of Department of Geography, Dr. Kanailal
Bhattacharyya College**

A field survey was conducted on 2nd and 3rd December, 2021 at Taki Municipality of Hasnabad Community Development Block, North 24 Parganas. 15 students attended this field survey, accompanied by 2 teachers and 2 lab attendants. Socio economic status of this study area was assessed by household survey. Hotel survey and market surveys were also conducted to study the status of tourism. Physiography was studied by means of dumpy level survey and soil sample collection followed by soil testing in the laboratory of the college. Mini Sundarban comprising of Golpata Forest was observed and mangroves were studied. Taki forms a remarkable tourist attraction due to Ichhamati river which marks Indo Bangladesh border.
