. 33% of the mentees say that their family members also shared his or her device.

.None of the respondents report any discontinuation of studies among their family members during the lockdown.

OBSERVATIONS :

As per the responses recorded above, concerned students' daily life was not disrupted much during the lockdown. They however had to adjust their life- style in the pandemic situation. They did participate in online classes, but faced network problem. Overall, they maintained Covid – 19 protocols. Please note , these observations are strictly based on the responses received.
